## Short Description

---

Yasya, high-end tower cooler is based on the newly developed T.M.L.F. (Trident Multi Layer Fin) structure. This provides a higher intake volume, thus enabling a more efficient use of the six fanned out copper heatpipes. For ventilation, new 120 mm fan "Slip Stream 120 Adjustable PWM" is used.

## Features

---

- Trident Multi Layer Fin Structure:  
By placing the number of triangle shaped main & supplemental heatsink fins to maximize the air intake volume, heat absorb rate from the built-in heatpipes is ideal for extreme over-clocking purposes as well as to cool the high-end multicore CPU!
- Unparallel Six Heatpipe Construction:  
Total six heatpipes placed in unparallel position, increase in heat transfer speed is accomplished!
- Slip Stream 120 mm PWM Adjustable:  
Equipped with Scythe original Slip Stream PWM 120mm PWM Adjustable fan, it allows a user to choose the fully automatic PWM feature fan speed control or alternatively adjust the PWM band range to fulfill demands from silent to high performance users!
