Short Description

Product Details:

Panaflo axial fans, made by Panasonic, suit a wide range of applications. They force air out in a "funnel" type pattern, and are ideal when cooling a specific area such as a power supply that is surrounded by numerous components with minimum ventilation available.

Panaflo H1 series of case fans are highly rated for their high air flow, while using less power and less noise than the competition. Panaflos are the best computer case fans you can buy. Utilizing the new Hydro-Wave bearing technology, the Panaflo H1 series produces stellar CFM (cubic feet per minute), while still being some of the quietest fans on the market.

Note: Despite the 3 pin connector, this fan may not support RPM monitoring depending on the model the supplier currently has available. Please email in advance if you have to know for sure what model fan you will get. RPM sensing Panaflo fans generally have the "-BX" designation at the end of the model number. Also, please be aware that NMB is now producing most Panaflo fans and so your fan may be branded NMB or Panasonic. Be assured it is the exact same fan.

Features

- Hydro Wave Bearing
- Aerodynamic blade and venturi design
- Locked rotor protection and auto-start function
- Lower circuit noise via a new IC
- Easy access to lead wires via plug-in connector on housing

Your choice of 3-pin or 4-pin tail. Fan cable is 100% wrapped in nylon Techflex sleeving and premium heatshrink, colors of your choice.

Purchase additional tails here:

3-Pin

Specifications

- Fan Size 80x80x25.4mm
- Input power 2.08 Watts
- Rated Voltage 12 V
- Bearing Double Ball Bearings
- Air Flow 39.6 CFM
- Rated Speed 2950 RPM
- Noise 32 dB(A)

Additional Information
