Short Description

Panaflo 4 Pin Tail! Tail any Panaflo with a Molex connector in Seconds!

Description

Product Details:

Panaflo 4 Pin Tail! Tail any Panaflo with a Molex connector in Seconds!

For years overclockers have lamented that the Panaflo - one of the best fans on the market - comes with bare leads. Now you can have professionally tailed Panaflo fans without tools, soldering, or wiring.

These tails are installed by removing the bar leads from your fan by merely pulling off the plug that they are attached to. Then, you take our Panaflo Tail and insert the Panaflo OEM plug into the socket. Its as easy as that.

NOTE: RPM monitoring fans have a special rotor sensor. This cable cannot transmit the RPM signal through a 4-pin Molex connection since it only provides the +12V Power.

Fan cable is fully sleeved in nylon Techflex sleeving and Premium heatshrink, colors of your choice.

Specifications

Specifications:

- Approximately 12 inches in length
- Panaflo OEM plug to 4 pin Molex
- Machine Made
- Warrantied against defects.
