

Alphacool Eisssturm Tornado Copper 60 2x140mm - complete kit

\$390.99

Product Images

Short Description

With the new Eissturm sets you get all the components you need for your start into the world of water cooling. The sets are not only for beginners but also for professionals. All components used are optimally matched and come from Alphacool's high-end series. Alphacool makes no compromises when it comes to materials and relies on pure copper or brass for all metals.

Description

With the new Eissturm sets you get all the components you need for your start into the world of water cooling. The sets are not only for beginners but also for professionals. All components used are optimally matched and come from Alphacool's high-end series. Alphacool makes no compromises when it comes to materials and relies on pure copper or brass for all metals. This guarantees outstanding cooling performance. With the set you can easily cool your CPU and you can also integrate any graphics card cooler into the circuit. Thanks to the enclosed quick-release fastener, they do not have to empty or modify the circuit.

Features

Radiator NexXoS UT60 Full Copper 280 mm

For many years Alphacool has been a leader in the field of radiators. Due to the consistent use of pure copper for the cooling fins, antechambers and ducts, Alphacool radiators lead the field in terms of performance. The Alphacool NexXoS radiators offer outstanding performance when using slow-speed fans and offer a high performance reserve when a lot of heat has to be dissipated. This allows them to cover a wide range of applications.

CPU Cooler: XPX

The Alphacool Eisblock XPX cooler has repeatedly been voted the most powerful CPU cooler on the market in independent tests. In addition to excellent workmanship, care was also taken to ensure that the cooler base is large enough for CPUs that rely on eight or more physical CPU cores. If you want to customize your CPU cooler, you can use modding kits from Alphacool. The CPU cover, the screw caps and the mounting frame can be exchanged for other colors.

Reservoir: Eisbecher

With the Eisbecher Alphacool has launched an outstanding tank on the market which offers not only high quality and compatibility but also the well-known Lighttower water effect. The water flows up a riser tube and is then sprayed against the inside of the reservoir. A real optical highlight. The installation possibilities are also very extensive. The Eisbecher can be mounted directly on a radiator or with normal feet on the bottom of the case.

Pump: VPP755

The VPP755 Eispumpe is the further development of the classic D5 pump. It is quieter and more powerful than this one and also offers the possibility to control the pump manually or via the 4-pin PWM connector.

The pump is about 1cm shorter and therefore more compact than a classic D5 pump. The entire pump is enclosed in a stable and extremely noble aluminium cap.

Fans: Eiswind Silent Edition

The new Eiswind fans of the Silent Edition are based on the worldwide popular be quiet! fans. The finely ribbed fan blades ensure optimum air flow and targeted turbulence to minimize background noise. A fluid-dynamic bearing with a service life more than three times longer than a classic rifle or sleeve bearing. A further advantage of this elaborate fan bearing is its extremely low inherent vibration, which benefits the overall volume. The fans can be controlled via the 4-pin PWM connector over a wide speed range.

Connections and quick-release connector:

Alphacool makes no compromises when it comes to connections. All connections are from the high-end Eiszapfen series and are made entirely of anodized brass. Thanks to the wide ribbed outer surface, the connections can be screwed in very easily. The union nut presses the hose firmly against the connection and contributes to safety. The enclosed quick release fastener makes the set Eisbaer Ready. Many products such as the Eiswolf GPX-Pro cooler, the external water cooling solution Eiswand and other Alphacool products rely on this quick release fastener. In this way, they can easily and quickly combine or separate the products from each other again.

The set includes everything you need for the start. Hoses, the necessary liquid, a filling aid, Y-adapter for the fans and much more. The manual is very extensive with many pictures describing all parts in their function. With an ice storm set you get the perfect set for your water cooling.

Specifications

| | |
|---------------------|---|
| Manufacturer: | Alphacool |
| Radiator Thickness: | 45mm |
| Radiator size: | 2x140mm |
| CPU Performance: | Excellent |
| Prefilled: | No |
| Hose dimensions: | 13/10mm |
| Socket: | AMD AM4, AMD AM3(+)/AM3/AM2(+)/AM2/939/FM2(+)/FM2/FM1/G34/940, Intel 2066, Intel 1151/1150/1155/1156/755/2011-3/2011/1366 |

Technical Details

- Radiator
NexXxoS UT60 Full Copper 280 mm
- CPU
Eisblock XPX
- Pump
Eispumpe VPP755
- Reservoir

Eisbecher 150mm

- Fan
2x Eiswind Silent Edition 140mm
- Accessories
8x Eiszapfen fittings 13/10mm straight
2x Eiszapfen fittings 13/10mm 90° angled
1x HF quick connector G1/4
1000 ml Cape Kelvin Catcher
3 m tube PVC 13/10 mm clear
1x filling aid - Funnel
1x ATX bridging plug
1x Y-cable 4-pin PWM
1x hose cutter
1x installation guide

Scope of Delivery

- Alphacool Eisssturm Tornado Copper 60 2x140mm - complete kit

Notice:

Attention: The manufacturer Mayhems advises that Mayhems fluids, especially the Aurora line of products, have been manufactured and distributed solely for show and modding purposes. These should not be utilized in the system for more than 14 days.

We would also like to advise that Mayhems fluids can damage water cooling products, and using Mayhems fluids can thereby void the warranties offered by the following manufacturers: Koolance, Phobya, Alphacool, Aqua Computer, Watercool.

Damages such as: clogging, corrosion of aluminium radiators, deterioration of glued containers, etc., are a consequence of the use of Mayhems, but will not be reimbursed by Mayhems. Use is therefore at one's own risk.

Additional Information
