\$56.95

## Product Images

## Short Description

The EX series combines the low profile design of our RS series radiators with the high performance of our award winning RX V1 series. This has been possible due to several manufacturing advances including, split fins, improved soldering techniques, and welded seam tubes. The EX series has been designed and optimised for low speed fans, so it can offer high performance cooling at very low noise levels.

Crossflow radiators allow for easier tubing routing in some PC builds. Our selectable crossflow design allows you to choose the most suitable inlet and outlet positions for your build.
