

SilenX IXA-FCEX External 4 Channel Fan Controller with AC & DC Adapter

\$34.99

Product Images

Short Description

The ixa-fcex allows you to control fan speeds for four fans with or without a computer power supply to power up your fans. When used for your computer disregard the included ac/DC adapter simply connect the molex connector attached to the fan controller to your power supply to power up your fans. When used as a standalone device to cool your av equipment aquarium lighting or cabinets use the included ac/DC adapter to power up your fans. Has an led indicator light for each channel when a fan is powered up. When every other company out there makes variations of the same basic fan controller we've come up with a solution to make it truly versatile and practical!
