Short Description

To meet the rising demand from enthusiasts with keen sense of style and expressive personality, SilverStone created the FG141, a 140mm fan grille with 28 integrated RGB LEDs. This brilliant kit can be controlled by hardware or software that can manipulate +12V, G, R, B, signals such as RGB LED control box or motherboard. With the FG141, any 140mm fan or fan mount can be turned into an RGB display source so users can freely choose the exact fan they want to use without being constrained by the limited number of RGB fan models.
