Short Description

Thermaltake lives up to its reputation and continues on producing their supreme performance heatsinks. Their latest release, the Silent Boost, just about covers everything there is to think about in a heatsink. With the Silent Booster's new 3-point metal clip feature, you don't have to worry about bolts and holes and such. The clip grabs all three prongs on the CPU socket for secure mounting and attaches with no trouble. The all-copper base and huge surface area provides better heat transfer and the new unique fan frame design of this heatsink-fan combo creates a multi-directional air intake, which means an increase of airflow while keeping the relative noise at a minimal. Reliability? That's been taken care of, too. The high performing "Hydro Wave Bearing" fan decreases bearing wear and extends the MTBF (Mean Time Between Failures). This package comes complete with installation guide and one packet of thermal compound.

Features

- Application for AMD Opteron and Athlon 64
- Heatsink : All copper, larger area for improving heat dissipation
- Fan : Unique fan frame, multi-directional air intake increases airflow while keeping the relative noise at minimal
- Clip : New design tool-free metal clip, easy to install

Specifications

P/N	A1838	Fan Speed	2450±10% RPM
Fan Dimension	80x80x25 mm	Max Air Flow	27.5 CFM
Heatsink Dimension	85x73x48 mm (46 fins)	Air Pressure	25.97 Pa-min
Rated Voltage	12V	Noise	21 dBA
Started Voltage	7V	Bearing Type	Ball Bearing
Rated Current	0.13A	Life Expectation	60,000 hours
Power Input	1.56W	Connector	3 PIN

Additional Information

Brand	Thermaltake
SKU	A1838-D
Weight	1.5000
Compatibilty	AMD64/K8
Material	Copper/Aluminum
Fan Dimensions	80mm
Fan Connection	4-Pin PWM
