

# HDD Vibration Absorber - 5.25" Bay Mount System with Easy Drive Removal System

Special Price  
**\$18.95** was  
~~\$24.95~~

## Product Images

## Short Description

Now this is a great idea to finally install your SATA or IDE hard disk drives in one of your 5.25" case Bays without spending \$30.00-50.00 on some fancy rack with LED's that you simply have no use for. Mitron's patented design offers easy mounting and removal of your HDD which can still hide behind your bay covers via a slide out rack system. The silicon rubber mount wheels dampen all HDD noise and absorb any shock of your drive during case movement. We have tried these in house and they are very slick mounts!
