Description

Product Details:

Now you can use your ZM-RS6F headphone with your home stereo. The ZM-RSA is the first of its kind. It is a 5.1 channel headphone amplifier which can connect to your stereo receiver using RCA cables. You can get front, rear, center and sub woofer sound through the amplifier to your headphones making it great for just about anything you can plug into your surround sound receiver. This amplifier is also capable of handling two headphones with separate volume controls for each.

When all the lights go down and the house is asleep you can still pump up the volume have your own private theater. Use this amplifier with the RS6F headphone to listen to surround sound music, watch DVDs, play games including XBox & PS2, or whatever else you can think of that would require 5.1 Ch sound.
