## Product Images

## Short Description

### Product Details:

The fastest way to get infected with our UV-active™ fever. These Blackfire4 fans have 4 built-in UV LEDs to light themselves up with UV. Everyone has one or two LED fans - it's time for you to get different and get UV-active™. 4x UV LED for 4x the UV power.

The Blackfire4 are UV-active™ clear fans. The vibrant clear colors look great in normal lighting. Once turned on, the 4x built-in UV LEDs provide the UV lighting for the fan to glow - an intriguing vibrant luminous effect. A great addition to side window blowholes, or top / front blowholes.

Lighting for PC is no longer just sticking in a CCFL light. Do take time to plan the various aspects of lighting such as ambient light for general background, directional & angular lighting, highlight spots etc. AC Ryan provides a range of lighting TWIN CCFL, Tornado2 CCFL Fans, LaserLEDs, XNEON cables. Combining a CCFL light tube and a Tornado2 can give you interesting results - eg. Blue CCFL light tube at the bottom of the casing providing a bottom up ambient lighting and a Tornado2 Green at the top blowhole providing circular top-down spot light. Add Blackfire4 for that highlight effect.

Cables come pre-sleeved with color matching UV FlexSleeve™ !
