If these mounting holes does not fit your radiator - do a favor for your watercooling brothers - drop us an email with the brand / model / url so we can look into get new RadGrillz done. [radgrillz@acryan.com](mailto:radgrillz@acryan.com) Better yet, send us the measurements of your radiator mounting hole positions.

\*\*Please note that the fan screw holes are purposely made on the small side so that they can be enlarged with a drill to the correct screw size and slightly to either side of the screw hole to cover more radiator installations. RadGrillz have been found to work fine with Hardware Labs (Black Ice) and Swiftech Radiators but, not the Thermochills. \*\*

-----  
AC Ryan RadGrillz are specially designed & made for watercooling radiators. These RadGrillz function as fanguards for your single / mulitple fan radiators. Precision cut from high quality material (available in Aluminium or Stainless Steel).

Aluminium Black (annodized) gives a cool matte black look and is ultra lightweight. Stainless Steel, the highest grade steel with high hardness & strength, gives a high-value polished look. Add on the cool superior look to your watercooling with RadGrillz. All RadGrillz are designed with airflow in mind for great looks *and* great performance.

Includes mounting holes for each fan. An additional 4 mounting holes in the corners is handy if you prefer to securely mount your RadGrillz rather than via the fans. Diagram template with mounting hole position / sizes is included.

AC Ryan says: "Mod supplies lets you mod the mod you want, the way you want it."
