Short Description

For those of you who are ready for something else other than the standard stripes, bricky, hexx motifs, here is Thrust - the first "design RadGrillz" - produced for watercooling radiators. Designed by TribalOverkill for AC Ryan, Thrust is futuristic and combines well with wide variety of styles.

Description

For those of you who are ready for something else other than the standard stripes, brick, hex motifs, here is Thrust - the first "design RadGrillz" - produced for watercooling radiators. Designed by TribalOverkill for AC Ryan, Thrust is futuristic and combines well with wide variety of styles. Inspired by thrustboosters and afterburners, Thrust looks even more fantastic when used with our Blackfire4 UVLED fans. 2x120 for radiators with 2x120mm fans.

Use these RadGrillz Templates for positioning your RadGrillz. Print it out and use it to drill holes! The template is also printed on the back of each RadGrillz's packaging.

RadGrillz have been used by many modders, check some of 'em out here at the [RadGrillz gallery](#). Got RadGrillz? Why not send your pics to us? [gallery @ acryan.com](mailto:gallery@acryan.com) We'd love to see 'em and show it to the watercooling brothers.

RadGrillz is known to fit these great radiators : Hardware Labs Black Ice* (aka BIX), Swiftech Radiators*, Alphacool Radiators*, Aqua Computer Radiators*, CoolingWorks*.

* this info does not cover any new models released in 2007.

RadGrillz does NOT fit Thermochill Dual and Triple Radiators (specifically PA120.2 / PA120.3) as they have different spacing between the fans. We've received several request for RadGrillz for Thermochill so we are doing an animocheck to see if there indeed is demand for it. So here's the dedicated email addy to let us know your vote for producing RadGrillz for Thermochill Radiators. [yesthermochill @ acryan.com](mailto:yesthermochill@acryan.com). You can say a few words or simply an empty email will do too.

If these mounting holes does not fit your radiator - do a favor for your watercooling brothers - drop us an email with the brand / model / url so we can look into getting new RadGrillz done. [contact @ acryan.com](mailto:contact@acryan.com) Better yet, send us the measurements of your radiator mounting hole positions.

AC Ryan RadGrillz are specially designed & made for watercooling radiators. These RadGrillz function as fanguards for your single / multiple fan radiators. Precision cut from high quality material (available in Aluminium or Stainless Steel, now also available in Acryl).

Aluminium Black (annodized) gives a cool matte black look and is ultra lightweight.

Stainless Steel, the highest grade steel with high hardness & strength, gives a high-value polished look. Add on the cool superior look to your watercooling with RadGrillz.

Acryl UVBlue & Acryl UVGreen, quality 3mm acryl for cool effects with the UV glow

All RadGrillz are designed with airflow in mind for great looks *and* great performance.

Includes mounting holes for each fan. An additional 4 mounting holes in the corners is handy if you prefer to securely mount your RadGrillz rather than via the fans. Diagram template with mounting hole position / sizes is included.

AC Ryan says: "Mod supplies lets you mod the mod you want, the way you want it."

Additional Information

Brand	AC Ryan
SKU	ACR-RG30151-D
Weight	1.2500
Color	Black
Radiator Size	240 (2 x 120mm)
Radiator Accessory Type	Radgrill
Material	Steel
Special Price	\$11.95
