2x CCFL = 2x the fun

2 for the price of 1

best of both worlds

advanced dual-driver silent inverter

Rear on / off (PCI Bracket)

brilliantly bright & long-life CCFL

plug n play

\*\* SLEEVED CCFL cabling (NEW)

\*\* MolexDuo pass-thru power connector (NEW)

Double up with the TWIN series that gives you double the value with 2x CCFL for the price of one. Be the brightest star in the universe ;-)

CCFL light has been the foundation of PC lighting with its highly suitable properties:

- extremely thin at 4mm, does not take up much space in the PC
- brilliant light, one of the brightest lighting type used in PCs
- does not generate any significant heat (CCFL = Cold Cathode Flurescent Light)
- low power requirement

## Features

---

Premium-quality CCFL lights

AC Ryan TWIN CCFL includes 2 premium-quality CCFL light tubes - brilliantly bright and long-life. The CCFL lights are individually encased in a clear hard acrylic tube. These hard acrylic tubes protect the CCFL from damage and breaking (50% of CCFL lights without acrylic cover are broken during usage or transport). They also double up as a light magnifier, giving 360 degrees unobstructed light throughout the entire length of the CCFL. The ends of the tubes are capped with clear acrylic cubes for easy mounting.

Advanced silent dual-driver inverter

At the heart of the TWIN CCFL is an advanced silent dual-driver inverter that powers 2 CCFLs. The inverter features our unique overheat protection technology to give you higher reliability. Besides the built-in on / off switch, a PCI bracket on / off switch is also included for your convenience.

MolexDuo pass-thru power connector

With the MolexDuo power plug, you will never run out of Molex power connectors. The MolexDuo has is female on one side and pass-thru male on the other. So everytime you connect an AC Ryan CCFL kit, there will still be an available power connector via the pass-thru MolexDuo! To install multiple CCFL kits, simply chain them up one after another.

Plug n play

To install the TWIN, simply plug in the 4pin molex connector to your power supply and turn it on!! All the parts are easily disassembled and assembled so you can easily change and modify them. The lights are connected to the inverter with 2pin plugs. You can easily plug and unplug them. Even the CCFL can be removed from the protective clear hard acrylic tube.

## Specifications

- CCFL:
- Length : 10cm
- Voltage : 570 ± 40V
- Current : 3.5 mA
- Brightness : Over 20,000 ± 10% cd/m2
- Lifetime : Over 15,000 hours
- Inverter:
- Input voltage : DC 12V (via 4pin molex connector)
- Output current : 2 outputs of 5mA each

Package contains:

- 2x 10cm CCFL light
- 1x advanced silent dual-driver inverter (with overheat protection / 4pin MolexDuo™ male+female passthru power connector)

## Additional Information

Brand	AC Ryan
