

# ROCCAT Sense – High Precision Gaming Mousepad - Glacier Blue

\$34.95

## Product Images

## Short Description

### Product Details:

ROCCAT™ Sense – High Precision Gaming Mousepad  
Precise, Unrestrictive, Secure

Never underestimate the influence of a mouse surface on your gaming performance. This is the reason why ROCCAT has developed the ROCCAT™

Sense gaming mouse pad which does not restrict the performance of your mouse and gives you highest comfort for hours and hours of gaming.

A large surface area (400x280mm) provides sufficient space even for rapid mouse movements in critical situations. The color variations have been selected to provide the mouse sensor with the ultimate optical response and its low height (1.35mm) guarantees optimum comfort and less strain on your hand and wrist.

Features:

#### MICROCRYSTALLINE COATING

The special surface coating made from micro-crystals bonded to a rubberized backing noticeably improves the gliding characteristics of the mouse. The coating ensures ultra-low friction between your mouse and the pad.

#### GAMER' S CHOICE

Recommended by international professionals, a mouse pad has been developed which is perfectly tailored to meet their requirements. Measuring in at 400 x 280mm, its generous dimensions provide sufficient gliding area for the mouse which is a must for professionals. At just 1.35mm high, resistance at the edges is minimized thereby allowing smooth pointer positioning.

#### GOT THE GRIP

The backing of the ROCCAT™ Sense is made of a special rubber material featuring a nano-sized pattern. It smoothes out the slightest of unevenes and provides the necessary amount of grip allowing the pad to sit securely on the desk regardless of how quickly you move the mouse.

Specifications:

- MINIMIZED FRICTION  
thanks to the microcrystalline coating bonded to a particularly soft cloth base
- OPTIMUM GLIDING AREA  
and pointer positioning
- RUBBERIZED BACKING  
featuring a nano-sized pattern for the perfect amount of grip on any surface
- OPTIMIZED FOR GAMING  
and professional design applications
- DIMENSIONS  
400 x 280mm
- ULTRA LOW HEIGHT  
1.35mm
