Short Description

Alphacool's entry into the thermal compound market: Alphacool Silver Grease! Everyone needs thermal compound when assembling or working on a system. Of course only the best should be used for the finished system, but the cost of the thermal compound also needs to be considered. Especially when using expensive thermal compounds, things can get rather expensive when just testing a few different set-ups.

Description

Alphacool's entry into the thermal compound market: Alphacool Silver Grease!

Everyone needs thermal compound when assembling or working on a system. Of course only the best should be used for the finished system, but the cost of the thermal compound also needs to be considered. Especially when using expensive thermal

compounds, things can get rather expensive when just testing a few different set-ups.

This is where the new Alphacool Silver Grease is the ideal alternative:

For some it is a lifetime supply of thermal compound, for other users it is a great way to gain more freedom in experimenting with the system and different cooling solutions, as expensive thermal compound is no longer an issue. The compound is available in a 30g syringe or a 100g tub with a handy spatula. This packaging size ensures that there's always plenty of thermal compound available.

The silicone-based thermal compound also contains silver particles, ensuring good thermal transfer whilst not being electrically conductive

Note: This Item can not be shipped using DHL

Specifications

Technical specifications:

- Content: 30g
- Material: Silver particles, silicone
- Color: Grey
- Electrically non-conductive
- Suitable for high contact pressures
- Conforms with RoHS regulations

Extent of delivery:

1x Syringe

Additional Information

Brand	Alphacool
SKU	AC-31089
Weight	0.1000
TIM Type	Paste
Vendor SKU/EAN	4250197121514
Internet Reviews	Review: Powerbase
Special Price	\$6.95
