\$19.95

Product Images

Short Description

The HEATKILLER GPU® is a stylish addition to the backplate of the cool-cases HEATKILLER® GPU-X3 series. It is mounted on the

back of the video card and evaluates their stability and look on.

Description

The HEATKILLER GPU® is a stylish addition to the backplate of the cool-cases HEATKILLER® GPU-X3 series. It is mounted on the back of the video card and evaluates their stability and look on.

As the material is polished stainless steel. The adjustment in the center section improves the mechanical stability. This increases in the assembled condition the torsional stiffness of the graphics card.

At the bottom are insulating spacers for the easy and simple assembly.

The material is optimized for use with a water cooler of the HEATKILLER® GPU-X3 series. The backplate can also be used for other Wasserkuhler-Modelle needs here, but there may be an adjustment of the mounting hardware.

The fitting instructions for the backplate is part of the assembly instructions for the GPU cooler. This can in German and English language in the Servicebereich our website.

The backplate is also the HEATKILLER® GPU-X3 79X0 "XFX Edition" compatible.

Specifications

Technical data:

- Material: stainless steel
- dimensions: (lwxh) 264x98x3mm Weight
- Weight: 250g
- Compatible for: AMD Radeon R9 280X (reference design), AMD Radeon HD 7970 (reference design), HEATKILLER® GPU-X3 79X0 "XFX Edition"

Includes:

- 1x HEATKILLER® GPU Backplate R9 280X 1x
- Mounting Hardware
