## Product Images

## Short Description

The heat sink of the HEATKILLER® SW-X series are specially designed for cooling voltage transformer on modern motherboards. They can be mounted Alternatively, for the factory installed passive heatsink.

## Description

The heat sink of the HEATKILLER® SW-X series are specially designed for cooling voltage transformer on

modern motherboards. They can be mounted Alternatively, for the factory installed passive heatsink.

This passive heatsink often work at their thermal limit. If then also the processor cooled with a water condenser, missing the supporting air stream. As a result, the thermal load of the voltage transformer increases. Then barely enough power reserves are available for extensive overclocking. The remedy here heatsinks of HEATKILLER® SW-X series. This lead the generated heat energy very quickly over the water cycle. This allows the computer work even at the limit.

Due to the lower thermal load of the electronic components also increases their lifespan. Especially for high-quality motherboards therefore recommend the use of water coolers on heat-sensitive components.

When HEATKILLER® SW-X series is-cooler. By large volume designed channels the flow resistance remains gering. Der structure is very simple and modular. The modular design of the cooler can be used for the next generation motherboards. For this purpose, only the bottom plate has to be replaced in the ideal case. For selected motherboards we have adapted floor panels in the program. For all DIY floor slabs are available.

When selecting the proper heat sink for your motherboard will help our compatibility list.

Production of the HEATKILLER® SW-X cooler on a modern CNC machinery in our facilities in Germany. As the material Electrolytic copper comes with a purity of over 99% is used. For the cheapest LT version uses for the shell in addition a high-quality industrial plastic (POM).

## Specifications

---

Scope of delivery:

- 1x HEATKILLER® SW-X A17 LT

Compatible with:

- ASUS X99-A
- ASUS X99-S
- ASUS X99 DELUXE

## Additional Information

---

Brand	Watercool
SKU	WC-11437-D
Weight	1.0000
Color	Black
Chipset Motherboard	Asus X99
Block Style	Copper-Acetal
Special Price	\$58.00
