## Specifications

---

### Specifications

- Bottle Size: 2oz
- Included: 2oz Rad Clean, 2 plastic fittings w/ orings, 1 threaded funnel
- Dosage: Mix 1/2 bottle with 32oz of DI or distilled water

### Compatibility

Rad Clean is compatible with the internal metals found in radiators only! Using Rad Clean on nickel items is NOT compatible!

### Instructions

For this pre-treatment to work correctly follow the instructions below.

Step 1: Dilute one half bottle of RadClean into 32oz of distilled/Ro/Di water.

Step 2: Fill radiator up with Radclean mixture

Step 3: Close both ports with plastic fillports. Ensure they're plastic. Shake radiator.

Step 4: Let your radiator sit for one hour.

Step 5: Drain radiator and flush radiator extensively with distilled/ro/di water

Step 6: Drain radiator and let dry completely.

### Warnings

Important to use plastic fittings when cleaning radiators while using Rad Clean! PrimoChill is not responsible for any hardware damage. Use at your own risk.
