Description

PrimoChill System Soap is a cooling loop cleaner that helps you flush Primochill Vue out of your system, Helps clean Hardware and helps lubricate tubing for easy bends.

Note: This Item can not be shipped using DHL

Features

- Cleaning your water cooling parts before install - Mix a few drops with warm water and scrub your parts to a pristine clean.
- Perfect lube for bending rigid tube - Mix a few drops with warm water and soak your bending cord. - Before inserting bend cord, add a few drops right into the end of the tube and your cord will slide in perfectly with no oil residue.
- Gentle non-toxic cleaner for those hard to remove coolant collections. Fill your loop with DI or Distilled water and warm up the loop by gaming/benching or simply unplug a couple fans and the water in the loop will heat right up. Once heated up add a couple drops to the system while the pump is running, not too much as you will have a foam fest.
- Washing your hands. Perfect soap for cleaning your hands up after an all day computer building session.
