

ROCKIT COOL Quicksilver - Solder Remover - Large(10 CPU)

\$13.99

Product Images

Short Description

Rockit Cool Quicksilver solder remover is used to quickly remove the STIM from your 9th Gen CPU & IHS.

Description

Rocket Cool Quicksilver solder remover is used to quickly remove the TIM from your 9th Gen CPU & IHS. The quick and easy way to remove the solder from your CPU without dangerous scrapers or heat.

Note: This Item can not be shipped using DHL

Features

- Super easy and pain free removal of the solder
- Includes metal polish to remove the thin layer under the solder

The chemical reaction dissolves the solder and leaves behind a clean surface.

Non toxic, safe to handle. Environmentally safe, NO MERCURY.

INSTRUCTIONS

Note: while this appears to be similar to Liquid Metal TIM, it is not. It will not harm the CPU or IHS but the temps are not going to be as low as commercially available Liquid Metal TIM.
