Short Description

Rockit Cool Cleaning kit to deep clean your CPU or Copper IHS

Description

Rockit Cool Cleaning kit to deep clean your CPU or Copper IHS

Features

- Cleaner for all types of TIM
- Scrubbing pads to get crusty old TIM
- Microfiber TIM applicators makes applying TIM so easy
- FLITZ metal polish to give it that finishing touch

Prepare your CPU for the best temp drop possible

Restore your Copper IHS to like new.

Enough to do many CPUs and IHS

We highly suggest using acetone to supplement our cleaning kit. Typical nail polish remover - if it is pure acetone - can be found in many shops such as grocery and pharmacy. Homedepot, Lowes, Walmart, Target and more sell acetone in larger quantities.

Due to not being able to source a bottle that is high quality, we have decided to drop the Acetone from the cleaning kit.
