Increase the intensity of the dye in your coolant

Add EC6 ReColour to your EC6 or ECX Coolant to increase the intensity of the colour.

Change the colour of white or clear coolant

EC6 ReColour can be added to EC6 Clear or EC6 Opaque White coolant. Mix at a ratio of 6ml per litre to match our pre-mixed coolant colours.

Create custom colours by mixing EC6 ReColour Dyes

All colours of EC6 ReColour can be mixed to create custom colours. e.g. add Clear UV to UV Blue to increase the UV intensity.
