Short Description

The Nexus 92mm Real Silent Case Fan is the ultimate solution to bring some extra airflow in your quiet computer. Don't you just hate it when you have build a nice and quiet computer and it turns out that your high-end components are producing so much heat the temperatures in your computer case are getting too high? The Nexus Real Silent case fan is the solution for you. The Nexus 92mm Real Silent case fan provides a tremendous airflow without being noticeable noise wise.

The Nexus 92mm Real Silent case fan is equipped with a double sided 4-pin power connector and a 3-pin motherboard connector. This allows you to connect the case fan directly to the power supply or to the motherboard.

The latest version of the Nexus Real Silent case fan comes in black and white and inside the package a set of 4 ultra-soft Silicon Fan Mounts are supplied.

The Nexus 92mm Real Silent Case Fan is the ultimate solution to bring some extra airflow in your quiet computer. Don't you just hate it when you have build a nice and quiet computer and it turns out that your high-end components are producing so much heat the temperatures in your computer case are getting too high? The Nexus Real Silent case fan is the solution for you. The Nexus 92mm Real Silent case fan provides a tremendous airflow without being noticeable noise wise.

The Nexus 92mm Real Silent case fan is equipped with a double sided 4-pin power connector and a 3-pin motherboard connector. This allows you to connect the case fan directly to the power supply or to the motherboard.

The latest version of the Nexus Real Silent case fan comes in black and white and inside the package a set of 4 ultra-soft Silicon Fan Mounts are supplied.

Features

1500 RPM

High airflow level, 27 CFM

The Nexus 92mm Real Silent case fan produces only 19.2 dB(A). This value is the result of numerous tests in an anechoic chamber following the highest standards. We have compared this case fan with the quietest case fans available and we simply cannot find another one this quiet!

* Notice:

When we test the noise level of our case fans we do this in anechoic test chamber under free air condition. The chamber background noise is 17.0 dB(A), reading is done using a Spectrun Analyzer. The below set-up is used and these are the most common conditions for these type of tests and hence you should always be aware when a manufacturer is claiming dB(A) values that are lower then 15 dB(A). Because how where they able to measure this? We provide the real figures, from the actual tests. Can it get any more reliable...? Judge for your self.

Nexus provides the exact details of our noise level test as we feel dB(A) values are difficult values to compare as there are many ways of testing and calculating. In the market there are a lot of unrealistic dB(A) value-claims which are often calculated by means of extrapolation. This in fact does not give a realist view of the fans noiselevel performance.

Specifications

- Model number: DF1209SL-3
- Dimensions: 92x92x25mm
- Versions: Black
- Weight: 98.5 grams
- Voltage: 12 Volts
- Voltage Range: 10.2 ~ 13.8 Volts
- Input Current: 0.25 Amp Max
- Rotation Speed: 1500 RPM
- Acoustic Noise: 19.2 dB(A)
- Airflow: 27CFM
- Operation Temperature: -10 to +65 C
- Warranty: 3 Years

Additional Information

Brand	Nexus Technologies
SKU	DF1209SL-3-D
Weight	0.6000
Color	Black
Fan Dimensions	92mm
Fan Width	25mm
Fan Voltage	12 VDC
Fan RPM	1500
Fan CFM	27
Fan Noise (dB)	19
Special Price	\$5.48
