Product Details:

Based on the award-winning SteelSeries Siberia Full-size Headset, the v2 features major enhancements in sound quality, comfort and its microphone. Every element of the v2 has been optimized for pro gaming, making the headset a preferred piece of equipment for the worlds' best competitive PC gamers - the most demanding headset users in the world.

Sporting 25% larger 50mm driver units, the SteelSeries Siberia Full-size Headset dramatically boosts overall acoustic performance. Experience a rich and detailed soundscape from immersive atmospheric background music to precise 3D positional sounds of footsteps, gunfire and more.

The close type ear cups feature thick leather padded cushions built from sound dampening foam, designed to offer passive noise reduction from loud surroundings and improve comfort over prolonged use. A virtually invisible uni-directional microphone can be retracted from the left ear cup, optimized for essential voice communications.

The v2 remains lightweight and its trademark headband suspension construction makes it extremely comfortable for use over long periods of time.

The USB version features a 7.1 virtual sound USB soundcard that which is a great alternative for your on-board soundcard. The USB

version supports the following systems: Win XP/Vista/Win 2000/Win 98/Win ME. The USB sound card is compatible with Mac, however the software is only available for Windows operating systems.
