## Product Images

## Short Description

---

The SteelSeries headset features 50mm drivers with a remarkably wide frequency response that delivers rich and detailed audio reproduction. The headset delivers a clean and clear soundscape from mood setting music to critical 3D positional sounds and alerts. The headset offers two interchangeable ear-cushions that provide long-lasting comfort: Open-type cloth covered foam ear-cushions with hear-through functionality and closed-type leather ear-cushions with noise dampening foam that increases passive noise isolation.

## Description

### Product Details:

The SteelSeries headset features 50mm drivers with a remarkably wide frequency response that delivers rich and detailed audio reproduction. The headset delivers a clean and clear soundscape from mood setting music to critical 3D positional sounds and alerts. The headset offers two interchangeable ear-cushions that provide long-lasting comfort: Open-type cloth covered foam ear-cushions with hear-through functionality and closed-type leather ear-cushions with noise dampening foam that increases passive noise isolation.

The SteelSeries 7H USB version provides 7.1 virtual surround and ensures gamers the exact same sound and settings no matter where they are in the world or at what computer they are playing. Its USB soundcard provides preset optimized profiles for both gaming and music genres as well as environmental settings that can be changed for quiet at home atmospheres to louder LAN party or tournament events. Users can personalize even more by tweaking these settings with its 12 channel equalizer.

The SteelSeries 7H USB can also be dismantled in 4 separate pieces, which allows for compact and easy transportation.

The right ear-cup features an "invisible" pull-out unidirectional microphone system, that can be discretely hidden when not in use. The durable braided cord includes built-in volume and microphone controls.

## Features

---
