Short Description

The SteelSeries 5H v2 USB soundcard offers a consistent sound experience allowing gamers to always play with the exact same sound and settings, no matter where in the world or at what computer they are playing. This product was designed for gamers with onboard soundcards and/or gamers who regularly find themselves playing at third party computers.

SteelSeries 5H v2 USB is one of the most popular gaming headsets on the planet. This headset has been used by talented gamers to win major international events like Electronic Sports World Cup, World e-Sport Games, World Series of Video Games, Kode 5, World Cyber Games, Samsung Euro Championship, ESL Extreme Masters and many others.

Description

Product Details:

The SteelSeries 5H v2 USB soundcard offers a consistent sound experience allowing gamers to always play with the exact same sound and settings, no matter where in the world or at what computer they are playing. This product was designed for gamers with onboard soundcards and/or gamers who regularly find themselves playing at third party computers.

SteelSeries 5H v2 USB is one of the most popular gaming headsets on the planet. This headset has been used by talented gamers to win major international events like Electronic Sports World Cup, World e-Sport Games, World Series of Video Games, Kode 5, World Cyber Games, Samsung Euro Championship, ESL Extreme Masters and many others.

When wearing the SteelSeries 5H v2 USB you'll immediately notice the enormous full-size ear cushions which gently fit around your ears and reduce background noise. The comfort is something that has to be experienced first hand, either at a friends house or at one of the many LAN-centers and internet cafés that offers the headset to their customers.

The headset features a custom-engineered soundscape designed to enhance performance and immersion in FPS games. This headset was developed and optimized specifically for in-game sound frequencies found in the most popular shooters - making in-game sounds like footsteps, alerts and gunfire especially clear. You will be able to hear and pinpoint the location of your opponents, often before they hear you. Thanks to the USB soundcard you can boost and lower frequencies of your own choosing, allowing optimization for your favourite games.

The SteelSeries 5H v2 USB can easily be dismantled into three separate parts, that easily fit into a bag or a carrying case. This makes transportation of the headset both easy and safe. The pull-out microphone is practically invisible when not in use.

The USB soundcard supports the following systems: Win XP/Vista/Win 2000/Win 98/Win ME. You can download the latest driver [from here](#). While the USB sound card is not compatible with Mac, however the headset itself is.
