## Product Images

## Short Description

The SteelSeries Kana is an optical, ambidextrous mouse designed for all three grip styles: palm, claw and swipe. The functionality, ergonomic button layout and size was perfected alongside SteelSeries' professional gaming teams, who also tested and validated the precision and power hidden in the Kana's modest exterior. Make no mistake; this mouse was built for consistency and accuracy even in professional tournament conditions.

## Description

The SteelSeries Kana is an optical, ambidextrous mouse designed for all three grip styles: palm, claw and swipe. The functionality,

ergonomic button layout and size was perfected alongside SteelSeries' professional gaming teams, who also tested and validated the precision and power hidden in the Kana's modest exterior. Make no mistake; this mouse was built for consistency and accuracy even in professional tournament conditions. Designed by Gamers: SteelSeries Kana is available in two versions; the first named White1.1, while the second was selected by SteelSeries' Facebook community of more than 300,000 gamers and where 60,000 "Likes" determined the winning design, Black1.1.
