

# Bykski G1/4 Male to Female 90 Degree Elbow Fitting - Grey (B-D90)

\$11.50

## Product Images

## Short Description

The Bykski G1/4 Male to Female 90 Degree Elbow Fitting allows you to change direction quickly with your loop. Note: Due to having no rotary function the direction of the fitting is dictated by the component it is used on. (Meaning once the fitting is installed, the direction of the outlet cannot be changed) This adapter is best used in a situation where you can move the component, like a fillport or another rotary adapter.
