\$29.95

Product Images

Short Description

These Temperature Displays for Barrowch replace your existing terminal on your GPU waterblock to give you real time temps.

Description

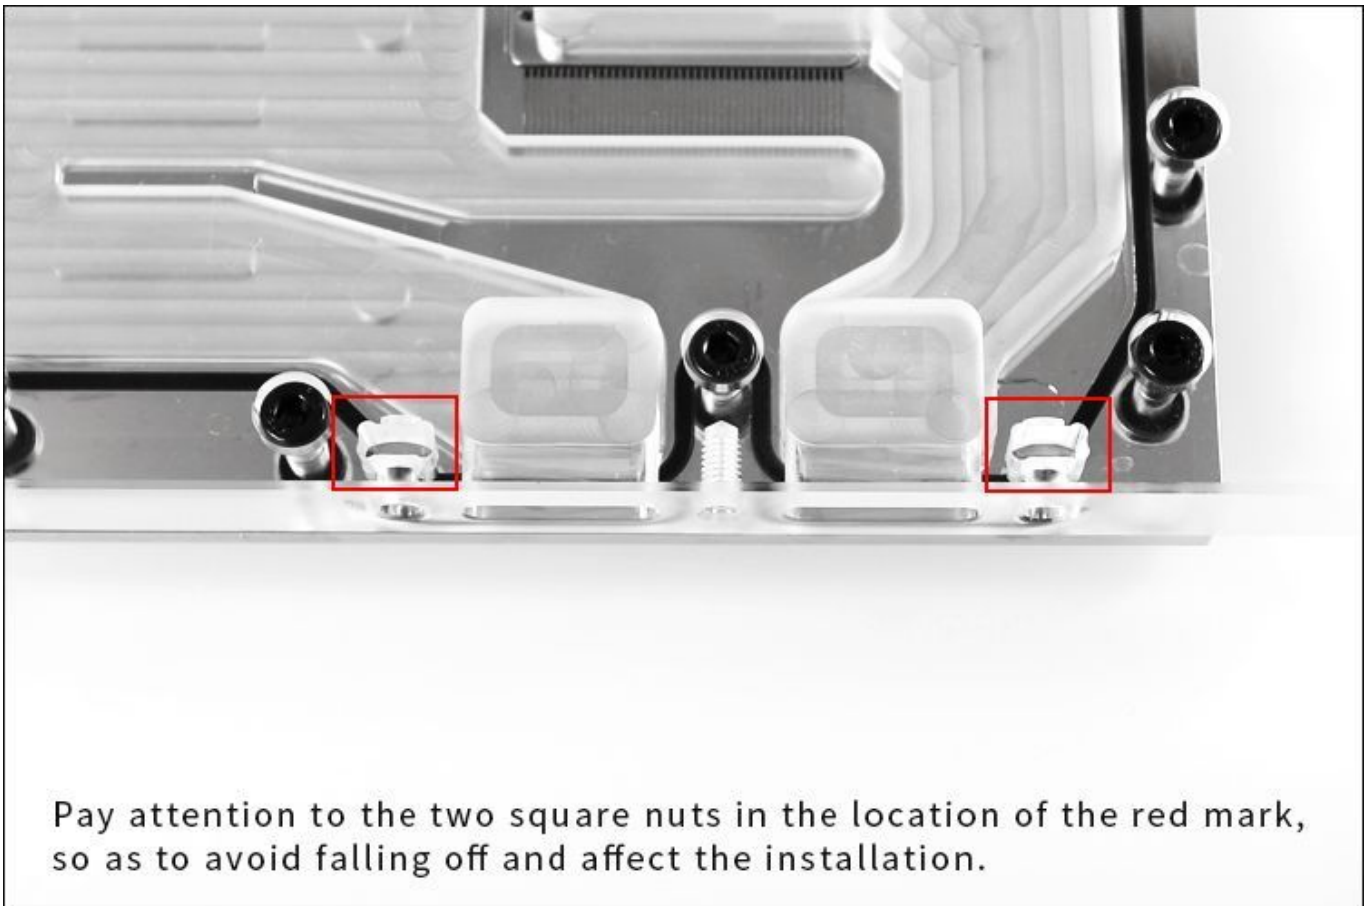

These Temperature Displays for Barrowch replace your existing terminal on your GPU waterblock to give you real time temps.

Features

Remove the red position screws shown in the picture and remove the original terminal.

Pay attention to the two square nuts in the location of the red mark, so as to avoid falling off and affect the installation.

Press two pieces gaskets in the digital display terminal slot (tip: gently pull it will be more easy to install).

Two screws have been built in the digital display terminal

Use the hexagon spanner to tighten the built-in screws through the red position in the picture, and pay attention to the installation direction of the terminal

Please check whether the terminal gasket is pressed to avoid leakage
