

Illuminated FireWire Data Flash Cable 6-Pin to 4-Pin Blue LED - 6 foot

\$7.95

Product Images

Short Description

Product Details:

Firewire, also called IEEE 1394 or i.Link, is the interface of choice for high end digital video cameras, external hard drives, external CDRW drives, and portable MP3 players.

With blistering speeds up to 400MB/second, you can move masses of data faster and with fewer hassles than ever before possible over Firewire. This cable has brilliant illuminated ends using blue LED's that flash as data pass through the cable!

Specifications:

- This is a professional grade Firewire cable.
- Connects an IEEE 1394 Firewire device with a 6-pin port to a 4-pin device
- Clear plastic jacket (shows silver braided sheathe).
- Molded strain reliefs at both ends.
- Transmission rates up to 400 Mbps
- IEEE 1394 compliant
- Illuminated Blue LED connectors

- 6 foot long (1.8 meters)
