Short Description

The Optimus 1200 is the premier gaming chassis of the IKONIK by LOGISYS line. Drawn from inspiration of legendary comics, the 1200 was designed for the gamer that is at forefront of technology and style. It boasts a tool- less set up to support device modularity, anti-vibration gear for a quiet acoustic environment, and an efficient cable-management system to accommodate both ATX and Micro ATX form factors. It also has pre- settings to upgrade to liquid cooling if desired.

Description

The Optimus 1200 is the premier gaming chassis of the IKONIK by LOGISYS line. Drawn from inspiration of legendary comics, the 1200 was designed for the gamer that is at forefront of technology and style. It boasts a tool- less set up to support device modularity, anti-vibration gear for a quiet acoustic environment, and an efficient cable-management system to accommodate both ATX and Micro ATX form factors. It also has pre- settings to upgrade to liquid cooling if desired. Great attention was paid to every detail of this case which allows no room for error. With its mesh interlocking design on the front panel, air flow is maximized to the interior of the chassis, while actively blocking out dust. The clever design of the red LEDs near the front mesh allows the light to shine out adding a sort of toughness and aggression to this chassis, distinguishing it from any other chassis on the market.

Features

- Midnight black full interior for visual attractiveness
- Bottom power supply installation designed for better ventilation
- Cable routing behind motherboard tray allows clean installation and easy maintenance of case
- Supports the latest 330 mm VGA card (ATI 5970)
- High speed IO ports are situated on top for easy access
