Special Price  
**\$41.97** was  
**\$59.95**

## Product Images

## Short Description

The Reactor Core reservoir is our answer to a simple, quality tube reservoir at an affordable price. The reservoir can be customized further by adding a Reactor Core CLS conversion kit, allowing you to illuminate the reservoir through an internal cathode. Perfect for making UV reactive coolants come to life.

## Description

---

The Reactor Core reservoir is our answer to a simple, quality tube reservoir at an affordable price. The reservoir can be customized further by adding a Reactor Core CLS conversion kit, allowing you to illuminate the reservoir through an internal cathode. Perfect for making UV reactive coolants come to life. The reservoir is composed of two CNC milled black Delrin caps that secure onto a threaded polycarbonate cylinder proven to resist cracking due to a variety of coolants over time. The reservoir features two ports on the bottom of the reservoir, and one fill port on the top. Side ports are available at an additional cost. Each reservoir comes with a pair of extra thick laser cut mounting clips and one Feser chrome fill plug.

Options:

- Optional Cathode Inverter Kit.
- Optional Choice of fittings below.

## Specifications

---

- Reservoir Material: Polycarbonate, Cast Acrylic. Black Acetal ends
- Length: 160mm
- Tube Diameter: 2"/50.8mm
