## Product Images

## Short Description

Mod/smart introduces their new cold cathode replacement tubes that are built for modders. The latest technology combined with true colored tubes guarantees you true color that you require to complete your color scheme. Rich color isn't the only great attribute of these cold cathode tubes. Durability has been increased due to two rubber vibration isolation grommets to prevent the glass from breaking.

## Description

Mod/smart introduces their new cold cathode replacement tubes that are built for modders. The latest technology combined with true colored tubes guarantees you true color that you require to complete your color scheme. Rich color isn't the only great attribute of these cold cathode tubes. Durability has been increased due to two rubber vibration isolation grommets to prevent the glass from breaking.

The installation process has been made easier than any light tube on the market. Peel and stick two small clips and snap in the tube. mod/smart provides double the standard wire length for easier installation and better positioning. This cold cathode tube is the easiest to install, richest colored and longest lasting ccfl tube ever produced. Replace your old and tired tubes with the latest and greatest mod/smart cold cathode tube. Can be used with any standard 2pin inverter. **\*\*Warning: DO NOT USE CCFL extensions with this product. Malfunction will occur.\*\***

All cathode wiring is covered in Premium sleeving and heatshrink, colors of your choice.
