## Product Images

## Short Description

Almost every computer case can use this handy device! The Sunbeam Multi-fan Power Port will tidy up your case by providing a central port to plug in six individual fans. All you need to add is one molex connector from your power supply to power this small hub. In addition, the multi-fan port has a blue LED for each fan header. So, there is no need for tons of splitters and adapters anymore with the Sunbeam Multi-fan power port!
