

Alphacool y-cable RGBW 5pol to 3x 5pol 30cm incl. connector - black

\$6.50

Product Images

Short Description

The new Alphacool Y-cable for 5-pin RGBW connections allows up to three individual RGBW components of the Alphacool RGBW family to be combined into one input. Thus, with an Alphacool Y-cable, these three components can be controlled to a RGBW output of, for example, motherboard, graphics card or RGBW controller. This allows RGBW solutions such as ASUS AURA, MSI MYSTIC LIGHT or GIGABYTE / AORUS RGB FUSION to be used to synchronize Alphacool RGBW products.
