Short Description

The Logisys Remote Control Do It Yourself Kit will allow you to turn any 12 Volt DC device on and off by remote control. It can be used for cold cathode kits, LEDs, fans, and much more.

Description

The Logisys Remote Control Do It Yourself Kit will allow you to turn any 12 Volt DC device on and off by remote control. It can be used for cold cathode kits, LEDs, fans, and much more.

Please note: some wiring is required to install the remote control unit. Instructions are included. Optionally, you can have Performance PC's crimp the pins, sleeve the cables and add the connectors. You just figure out what you want to control.

Features

- Turn any 12 Volt DC device on/off by remote control.
- Use with cold cathodes, Lazer LEDs, fans, and other 12 Volt devices.
- Includes 2 small remote control keypads with keychain hooks. Almost identical to automotive keyless entry in size and shape.
- Easy to install with basic knowledge
