Short Description

We noticed that most of you guys and girls were buying combs in bundles of 5 so have packaged them like this and now offer them at a 10% discount compared to loose combs!

Description

We noticed that most of you guys and girls were buying combs in bundles of 5 so have packaged them like this and now offer them at a 10% discount compared to loose combs!

The E22 cable comb makes it easy for anyone to achieve professional results on even the most unruly cable runs. These smaller combs have been created to work with OEM extensions such as the Bitfenix, Nanoxia and NZXT ranges.

NOTICE: Because these combs are made to work with such a large selection of cables they may not hold the cables as well as the regular ones hold Teleios. If you are looking for a truly professional finish we always recommend Teleios sleeving and E22 combs.

These little combs are available in 7 sizes (4, 6, 8, 12, 14, 16, 24) to suit any build configuration.

ps... they also work great for that final photo shoot when you don't want messy cables ruining a great build =)
