

Bykski G1/4 Female to Female Pull Drain Valve - Black (B-HP-DV)

\$13.50

Product Images

Short Description

Bykski G1/4 Female to Female Pull Drain Valve are a unique way to stop flow in your loop. Each drain valve is carefully machined to specifications that enable the user to install a G 1/4 fitting at both ends resulting in a sealable connection that allows for an easy drainport or fillport location to be made. By simply pulling the end in or out you can open/close the connection.

Description

Bykski G1/4 Female to Female Pull Drain Valve are a unique way to stop flow in your loop. Each drain valve is carefully machined to specifications that enable the user to install a G 1/4 fitting at both ends resulting in a sealable connection that allows for an easy drainport or fillport location to be made. By simply pulling the end in or out you can open/close the connection.

The unique design and ease of installation will be the perfect match for your next water cooling system. These fittings can be used on the top of your enclosure as a fill location or at the bottom as a drain.
