- Wall Thickness:4mm
- Length: 500mm
- Pack Size:4

#### Compatibility

- Fittings:14mm OD Rigid Fittings

### Parts Included

- 4 Pieces of 500mm PETG tube

### Installation

PLEASE NOTE: When using a bending insert with PETG, remember it is meant to have a tight fit. If it is loose, the rigid tube will collapse, kink, form air pockets and flat spots when heated. The tighter the fit, the better the result. This process requires patience, but will become easier the more you practice.

The bending insert requires some stretching and lubricating to get it in the rigid tube. Steps to success are below:

1. Stretch the bending insert. Remove any excess that isn't stretched.
2. Ream the rigid tube with an RFB for best results, (or a hand reamer if that's all you have). This will ensure a clean opening for easier insertion.
3. Lubricate by applying several drops of dish soap or olive oil on the bending insert itself and then place several more drops into the rigid tube.
4. Work the bending insert into the rigid tube. The more you use the insert, the easier this process will become.

## Additional Information

---

Brand	Bykski
SKU	B-PETGWP14-50-4
Weight	2.0000
Color	Clear
Tube Type	PETG
Tube Size	14mm
Material	PET
Delivery	Bulk
