## Features

---

### Style Meets Performance

Alphacool has already created a name for itself with its Eisblock GPX series among modders, gamers and performance enthusiasts. Alphacool offers several models to fit many NVIDIA® graphics card layouts, so there's something for everyone. For the first time the Eisblock GPX Plexi Light and Plexi is equipped with

ARGB (Addressable RGB) lighting. Also, for all fans of simplicity Alphacool also offers the classic acetal version, which lets your GPU stay sleek and beautiful with a minimalistic noble design.

#### Only the Best for You

The Alphacool Eisblock series is based on completely nickel-plated copper bottoms, which are made from a single block of copper. The flow is optimised by the generous water channels in the best possible way so that they have been finely tuned to dissipate the heat.

Thanks to the full cover design, all coolers have the performance to cool your GPU during all gaming and heavy-duty activities in the best possible way. This gives your hardware a longer life and protects it optimally. The included backplates puts the finishing touches to the Eisblock and perfectly crowns it.

#### Individually Tuned to Your System

Thanks to new ARGB technology, you can customise the Eisblock Plexi and Plexi Light more than ever before. These 5V addressable RGB LED´s can be connected to the Alphacool Elscontrol Controller (1015857, sold separately). Whether you like it colourful like a mystical unicorn or if you just want a single colour. The Eisblock with ARGB lighting makes it possible.

With the Eisblock Plexi variant you can see the fluid running through your water block and with the Alphacool Eiswater your gaming system is the eyecatcher at every LAN party.

#### No GPU fan, No GPU Sound

In addition to the increased performance, you have another advantage of water cooling in all situations: no annoying fans on your GPU and no excessive temperatures that make your graphics card howl. The Alphacool Eisblock Series completely replaces your GPU air cooler and helps you towards that silent system you've longed for.

## Specifications

---

#### Compatible to

- MSI GeForce RTX 2080 Gaming X Trio, 8GB GDDR6, HDMI, 3x DP, USB-C (V372-031R)

#### Technical Details

- Material Bottom: Nickel-plated Copper
- Material Cover: Acrylic (Plexi)
- Thread: 1/4"
- Connector: 3Pin ARGB (5V)

#### Scope of Delivery

- Alphacool Eisblock GPX-N Plexi Light RTX 2080 M05
- Backplate
- SLI Terminal
- Thermal Compound and Pads
- ARGB Cable
- Mounting Material

## Additional Information

---

Brand	Alphacool
SKU	AC-11690-D
Weight	3.1500
Color	Clear
Block GPU Type	Nvidia
Block Style	Nickel-Plexi
Vendor SKU/EAN	4250197116909
Special Price	\$9.99
