

CaseArts 3D Thumbscrews for Computer Cases (Set of 4) - Cross

\$8.95

Product Images

Short Description

Product Description:

Thumbscrews are now not only more convenient than traditional screws, but also much more attractive! They are excellent to decorate your computer cases. They will make your computer cases much easier to access - without a screw driver. These thumbscrews feel great when you touch them.

These thumbscrews are nice and solid; they not only look exotic but are also easy to use. A great way to customize your system with an artistic look. Every one in our office who has seen these, fell in love with them. These thumbscrews are embossed copper ones with bubble-dome protection and 3D effects. Features are printed on paper that is glued to an aluminum backing. The print is coated with a bubble dome. The new

technology uses copper to produce the feature which is embossed. As a result, the feature itself has a 3-dimensional effect and is very reflective, especially in the surrounding area of the feature. Retail Package includes 4 Thumbscrews.

3D Artistic Thumb Screws

Specifications:

Metallic embossed! The raised feature gives a 3D effect under the protective bubble dome.

Packaging: 4-pieces in one retail package with hanger. Most computer cases require 4-6 thumb screws to open the case panel. However, you may need only 2-3 to open one side. You can also use such a thumb screws on add-on expansion slots if you have a side window to show them. Fits almost all personal computer cases.
