

Cooler Master MasterCase MC500M Mid- Tower ATX Case

\$199.99

Product Images

Short Description

Fundamental to this re-imagining is FreeForm. We want you to have absolute control over how your case looks and functions, and that means giving you the option to adjust the exterior structure and aesthetic via a range of replacement panels and doors. Each choice changes the look and feel of the case, but also the flexibility of the interior layout.

Description

Cooler Master is breaking new ground in the way cases are designed, made and used.

Fundamental to this re-imagining is FreeForm. We want you to have absolute control over how your case looks and functions, and that means giving you the option to adjust the exterior structure and aesthetic via a range of replacement panels and doors. Each choice changes the look and feel of the case, but also the flexibility of the interior layout.

Features

Frame with Removable Partition Plate

The option to relocate the M.port and remove the partition plate gives you the freedom to adjust the inside of the case. With the partition plate installed, you isolate the power supply and cables for a clean build.

RGB enabled

Comes pre-installed with a RGB LED partition plate and with a fan and RGB lighting control board.

Advanced I/O Panel

Four USB ports, including one 3.1 Type C, added buttons for LED strip and fan speed control.

Clear View Inside

An edge-to-edge light grey tinted tempered glass side panel gives a wide view inside your PC to showcase your masterpiece.

Cable Management Cover

Cooler Master was the first to make a CPU cut out hole and we are the first to cover it again. A PSU shroud and additional cable covers take cable management to the next level. Assemble clean builds like a pro!

Adjust Internal Layout Clip-and-Click Panel

But this isn't just about aesthetics. Each decision opens new possibilities. Leveraging our unique clip-and-click panel, FreeForm lets users vertically adjust or entirely remove your optical disk drive (ODD) and HDD via sliding locks so intuitive you'll play with your configurations just for fun. Well, some people will. Just click-in the cages, and adjust the height to suit your needs. Position them at the top to allow room for up to three extra-long graphics cards, or retain only the bottom positioned cages to add a front-mounted radiator for even more cooling options.

Slip-and-Clip Pockets

The first Cooler Master case to incorporate two easy to install slip-and-clip solid-state drive pockets (2.5") with four easy mounting positions. Showcase them on the partition panel or hide them behind the motherboard tray for a cleaner look.

- A. Two behind the motherboard tray
- B. Two on top of power supply partition

Accessories

FreeForm extends beyond the case to include all the support you need in terms of selecting and purchasing components through a range of accessories to truly help you Make It Yours.
