

Channel Molding - Large

\$2.99

Product Images

Short Description

Channel molding can be used around windows or more frequently around fan intake and blow holes. This molding is made of durable rubber and is very flexible. This rubber molding wraps around the case hole for a durable, non moving seal. This molding is the perfect size for most thicker aluminum cases like the Wave

Master or Lian Li V Series. For thinner steel and aluminum cases, use our small channel molding.

Description

Channel molding can be used arround windows or more frequently around fan intake and blow holes. This molding is made of durable rubber and is very flexible. This rubber molding wraps around the case hole for a durable, non moving seal. This molding is the perfect size for most thicker aluminum cases like the Wave Master or Lian Li V Series.
