Short Description

The Sunbeam Rheobus has an excellent fit and finish. The quality look and feel combined with excellent functionality make this the best overall fan speed controller you can buy. Each channel supports up to 20 Watts, significantly more than other brands. From the off position, each of the knobs turns on with a satisfying tactile click.

Description

The Sunbeam Rheobus has an excellent fit and finish. The quality look and feel combined with excellent functionality make this the best overall fan speed controller you can buy. Each channel supports up to 20 Watts, significantly more than other brands. From the off position, each of the knobs turns on with a satisfying tactile click. The super bright LED lights up bright red. As you turn up the speed of each device, the corresponding LED changes from red to blue, indicating the relative voltage. The uniform tension of the knobs gives a quality feel that other controllers lack. This is the unit to get if you want smooth speed control and you will be adjusting it often.

*** Now optional modification to Blue/White LED's instead of Blue/Red!! ***
