

Alphacool Eistools Modding Cutter - Black

\$18.95

Product Images

Short Description

If you have already cut PETG tubing, you may have run into the problem of unclean and uneven ends. This means you must further process the tubing making everything much more cumbersome. This is now a thing of the past! With the Eistools Modding Cutter, Alphacool launches a versatile product on the market with which you can cut your hard tubes cleanly without great effort. It is also very good for modders!

Description

If you have already cut PETG tubing, you may have run into the problem of unclean and uneven ends. This

means you must further process the tubing making everything much more cumbersome. This is now a thing of the past! With the Eistools Modding Cutter, Alphacool launches a versatile product on the market with which you can cut your hard tubes cleanly without great effort. It is also very good for modders!

Features

No More Sawing PETG!

The well-known process remains the same: Heat up the Hardtube, cut it to the desired length, done! Alphacool does not reinvent the wheel here but improves the results many times over. Of course, the you can use the Eistools Modding Cutter with soft tubing too.

What's with the angle?

The biggest feature of our new tool is probably the use of different angles on the pliers. These are used especially in other parts of the PC. If you have ever modded a PC, you will know how useful cutting a perfect angle can be. If you want to cut some U-channel at a 45-degree angle – no problem! If you have some light defusing material that needs to be flush – no problem!

Additional Information

Brand	Alphacool
SKU	AC-11641
Weight	0.5000
Color	Black
Tubing Accessories Type	Tool
Material	Steel
Vendor SKU/EAN	4250197116411
