

WATERCOOL

Watercool HEATKILLER® NSB Rev3.0 Ni

\$45.95

Product Images

Short Description

The HEATKILLER® NSB Rev3.0 Ni combines cooling power with maximum flexibility. This chipset cooler has been constructed to fit almost any mainboard. The mounting plate can be turned, to allow mounting in any desired orientation – no matter how the mounting holes are placed. Two different mounting plates are included, which cover almost any possible mounting hole spacing from 43.0 mm to 79.2 mm.

Description

The HEATKILLER® NSB Rev3.0 Ni combines cooling power with maximum flexibility. This chipset cooler has been constructed to fit almost any mainboard. The mounting plate can be turned, to allow mounting in any desired orientation – no matter how the mounting holes are placed. Two different mounting plates are included, which cover almost any possible mounting hole spacing from 43.0 mm to 79.2 mm.

The bottom is manufactured from pure copper and utilises a highly efficient cooling structure. The flow resistance of the cooler is exceedingly small.

The top is manufactured from pure copper, plated with nickel, and features an ornament made from stainless steel just like the mounting plate. Despite the small dimensions (39 x 39 mm), the threads (G1/4") are a full 22 mm apart.

The HEATKILLER® NSB Rev3.0 Ni can be mounted on northbridges and on southbridges.

Specifications

Specifications:

Material: Electrolytic copper – nickel plated, stainless steel

Dimensions (L x W x H): 39 x 39 x 17 mm (block)

Weight: approx. 150 g

Pressure tested: 5 bar

Threads: G ¼"(DIN ISO 228-1)

Thread spacing: 22.0 mm

Included:

1x HEATKILLER® NSB Rev3.0 Ni

1x Mounting plate (43.0 to 59.0 mm)

1x Mounting plate (59.5 to 79.2 mm)

1x Installation material/manual

Additional Information

Brand	Watercool
SKU	WC-10203
Weight	1.0000
Color	Silver
Chipset Motherboard	Universal
Block Style	Nickel
Material	Copper
