Kingpin Cooling TEK-9 ICON V5

\$329.00

Product Images

Short Description

The TEK-9 ICON V5 is the latest revision of our legendary and best selling TEK-9 FAT line of full size gpu pots for both liquid nitrogen and dry ice.

Description

The TEK-9 ICON V5 is the latest revision of our legendary and best selling TEK-9 FAT line of full size gpu pots

for both liquid nitrogen and dry ice. Tuned for the hottest running graphics cards under extreme cooling temperatures. ICON V5 is fully reconfigured to support all RTX gpus and gives the best performance for single GPU overclocking and applicably sized dual spaced multi gpu configs. This new revision has fully revised gpu die contact area as well as improved internals to handle the heaviest heat loads while providing the ultimate temperature control. Container kit includes Tek-9 ICON V5 gpu unit with nickel plated solid copper design base w/ anodized aluminum top, 1 aluminum universal 8 point front side bracket compatible with many previous gens of cards and 1 NVIDIA 30 Series NVIDIA Ampere bracket + all required mounting hardware including thumb nuts and screws.
