Short Description

Advanced PC Lighting System with 4 Lighting Channel

With four separate channels, individually addressable RGB LEDs, and a variety of compatible accessories, the HUE 2 RGB lighting kit takes PC lighting to the next level. The HUE 2 is powered by CAM, so it's easy to change modes, sync lighting effects, and express your creativity with the perfect lighting for your build.

Description

Advanced PC Lighting System with 4 Lighting Channel

With four separate channels, individually addressable RGB LEDs, and a variety of compatible accessories, the HUE 2 RGB lighting kit takes PC lighting to the next level. The HUE 2 is powered by CAM, so it's easy to change modes, sync lighting effects, and express your creativity with the perfect lighting for your build.

Features

- Instantaneous response time and lighting synchronization across accessories
- Numerous presets, smart, audio, gaming and custom modes
- 4 independent channels supporting up to 40 LEDs or 6 accessories per channel
- Mix and match accessories in each channel based on your needs
- Easy set-up and control with CAM's intuitive interface
- *HUE 2 RGB lighting Kit is compatible with HUE+ LED strips and Aer RGB fans but cannot be mixed with HUE 2 accessories in the same channel. For HUE 2 accessories, each channel supports up to 40 LEDs and up to 6 accessories. Compatible with HUE+ RGB accessories*
