ARGB AIO Cooler

Short Description

A closed-loop liquid cooling solution that supports a wide range of Intel and AMD platforms. It creates amazing rainbow RGB lighting on its acrylic covered water block and similarly-square LED ring on the radiator fans, offering you the ability to create a visually-stunning rig that wows everyone. Cooling-wise, this liquid cooler features Enermax acclaimed technologies like vortex frame design for the fan and exclusive Shunt-Channel Technology (SCT) to quickly and efficiently take heat away—keeping your system running always cool and stable even under pressure.

Description

A closed-loop liquid cooling solution that supports a wide range of Intel and AMD platforms. It creates amazing rainbow RGB lighting on its acrylic covered water block and similarly-square LED ring on the radiator fans, offering you the ability to create a visually-stunning rig that wows everyone. Cooling-wise, this liquid cooler features Enermax acclaimed technologies like vortex frame design for the fan and exclusive Shunt-Channel Technology (SCT) to quickly and efficiently take heat away—keeping your system running always cool and stable even under pressure. You can control and customize the lighting via two ways: using the included control box, or through motherboard solutions including Asus Auro Sync, Gigabyte RGB Fusion, MSI Mystic

Light, etc. AQUAFUSION is one-of-a-kind cooling solution for custom gaming rigs or stunning system builds. AQUAFUSION comes in two sizes: compact 120 mm radiator and double length 240 mm radiator.
